## About

Computer Science Engineering student focused on Data Science, Python Development, and SEO, experienced in working on machine learning projects, handling real-world data, writing efficient SQL queries, and creating meaningful visual insights. Also skilled in on-page, off-page, and technical SEO, including improving website structure, speed, and search visibility. Comfortable with Git/GitHub, basic AWS concepts, and adapting quickly to new tools, with a problem-solving mindset and strong communication skills.

## Technical Skill

**Programming Languages:** Python, SQL, HTML, CSS, Java (Basic), JavaScript, Node.js

**Databases:** MySQL, SQL

**Tools & Platforms:** Visual Studio Code, Git/GitHub, Jupyter Notebook, Google Colab, Power BI, MS Excel, MS PowerPoint

**Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Scikit-learn

**SEO Tools:** Screaming Frog, SEMrush, Ahrefs, Moz, Google Search Console, Google Analytics, AdSense

## Projects

**Facial Emotion Recognition with Comforting Responses— (Python, CNN, OpenCV, Deep Learning)**

- Developed a system to detect human emotions from facial expressions using deep learning techniques.
- Integrated emotion-based comforting responses, making it suitable for mental health support applications.

**Fin Analytics Dashboard— (Next.js, Node.js, Express.js, PostgreSQL, Tailwind CSS)**

- Built a dashboard to manage invoices and vendor data with real-time financial insights.
- Implemented interactive charts, filtering, and analytics to track payments, expenses, and vendor performance.

**Customer Churn Prediction — (Python, Pandas, Scikit-learn, Matplotlib, Seaborn, Flask, Power BI)**

- Built a Customer Churn Prediction model using classification algorithms to identify customers likely to discontinue services.
- Designed an interactive dashboard for visualizing churn insights and prediction results.

**Healthcare Recommendation System — (Python, Flask, Random Forest Classifier, Pandas, HTML, CSS, Jinja2)**

- Built a website using Flask and Random Forest Classifier to predict diseases from symptoms and suggest precautions.
- Added user data handling, session management, and Jinja2 templates for personalized recommendations.

**Time Series Stock Prediction — (Python, Pandas, Matplotlib, ARIMA, SARIMA, Prophet, LSTM)**

- Built forecasting models achieving high prediction accuracy for NSE stock prices.
- Implemented data preprocessing, visualization, and performance comparison.

**Personal Assistant — (Python, Speech Recognition, pyttsx3, datetime, OS)**

- Developed a voice-enabled assistant using speech recognition & text-to-speech libraries to automate daily tasks.

**Smart Helmet — SIH Hackathon 2023**

- Designed IoT-based safety helmet integrating Adafruit libraries for accident detection & emergency alerts.
- Collaborated in a multi-disciplinary team, showcasing technical and problem-solving skills.

**Mystery Number Mania — (Python, Tkinter, random)**

- Created an interactive guessing game applying core programming concepts (loops, conditions, RNG).

## Internships

**SEO Specialist — Bridge Group Solutions**

- Optimized websites by On-Page/Off-Page/Technical SEO includes the quality content, primary keywords, no-duplicity, and sitemaps.

**Data Science and Analytics — Zidio Development**

- Executed 3 Data Science projects: Time Series Prediction, Healthcare Recommendation System, and Customer Churn Prediction.

**Cognifyz Technologies — Python**

- Conducted exploratory data analysis using Python libraries (Pandas, Matplotlib) to identify trends in datasets.

**Altair Data Science Virtual Internship**

- Completed 10-week program using RapidMiner for predictive modeling & data workflows.

## Certifications

**AWS Academy** – Cloud Foundations

**Data Analytics** – Microsoft Learn Journey

**MongoDB Basic Certification** – MongoDB University

**AWS Certified** – Cloud Practitioner

**Power BI** – Microsoft Learn Journey

**IBM Skills Build** – Cybersecurity, Solution Envisioning

## Education

**Meerut Institute of Engineering and Technology, Meerut, UP**

Bachelor of Technology in Computer Science Engineering (Data Science) (CGPA: 7.5)

(Ongoing)

**Translam Academy International (CBSE Board)**

Senior Secondary Examination

(Class XII): 87.6%

Higher Secondary Examination

(Class X): 81.6%

## Achievements

**Public Relations Head** — Data Science Club (organized seminars, hackathons, and provided tech support during events)

**Graphic Designer** — Created dashboards and visual materials for student clubs.

**Head of Dance Club** — Managed team and learnt leadership and time management skills.
